

NAME: HARIPRIYA S

ROLL.NO: 23L116

DEGREE: Bachelor of Engineering

BRANCH: Electronics and Communication Engineering

COLLEGE: PSG College of Technology, Coimbatore

Father's Name : SENTHILKUMAR D

Gender : Female

Date of Birth : 24 OCTOBER 2005

Languages : English, Tamil

E-mail : 231116@psgtech.ac.in

Permanent Address:

8/572, KALATHU METTU STREET,
EDAIYANCHAVADI, AUROVILLE POST,
VILLUPURAM, 605101,
TAMIL NADU

Contact Number : +91-9042059282

ACADEMIC RECORD

Course	Institution	Board/University	Completion By	Marks (%)
B.E. ECE	PSG College of Technology	Anna University	2027	7.73*
XII	Kuyillapalayam Hr Sec School Villupuram	State Board of School Education	2023	97.5
X	Kuyillapalayam Hr Sec School Villupuram	State Board of School Education	2021	PASS

* - Marks (%) upto 8th semester

Semester	I	II	III	IV	V	VI
CGPA/10	8.33	7.96	7.97	7.80	7.73	7.73

AREAS OF INTEREST

- Operating System
- RDBMS
- DSA

SKILL SET

Languages	C,C++
SOFTWARE TOOLS	LT-Spice,MS office ,Xilinx Vivado,Matlab

CO-CURRICULAR ACTIVITIES

Mini Projects

1. Compatible Light and Rain water automation sensor.
2. Joule thief Circuit.
3. Internal Circuit of IC LM 380 power audio amplifier.
4. Bidirectional Shift register.
5. Soft start circuit using IC 555.
6. An edge-native real-time water quality monitoring system for anomaly detection

ACHIEVEMENTS

1. Volunteered in Kriya 2023
2. Participated in Kriya 2023
3. Volunteered in Shristi 2024

HOBBIES

1. Hand crafting
2. Drawing
3. Tailoring
4. Embroidary work

DECLARATION

I, HARIPRIYA S do hereby declare that the information given above is true to the best of my knowledge.

Education

PSG College of Technology ,BE in Electronics and Communicaton Engineering (CGPA 7.73/10)	August 2023 - May 2027
Kuyilappalayam Higher Secondary School (Percentage:97.5%)	2023

Project

Compatible Light and Rain water automation sensor

Designed a compatible light and rainwater sensor system for automobiles using an LDR sensor to automatically dim the headlights when an oncoming vehicle approaches. A rain sensor is used to activate the windshield wiper whenever it starts to rain. The entire system is implemented by programming an Arduino board.

Joule thief Circuit

Designed a Joule Thief circuit using a BJT transistor to boost low input voltage and drive an LED. The circuit efficiently utilizes energy from low-voltage sources and is suitable for battery-operated applications.

An edge-native real-time water quality monitoring system for anomaly detection

An edge-native system that monitors water quality in real time using IoT sensors. It detects anomalies at the edge using an Isolation Forest model and sends alerts with cloud-based monitoring for timely action.

First Fault identification system using 8051 microcontroller

Designed a first fault identification system using an 8051 microcontroller. An 8051 MCU development kit was used, and the system was programmed in Embedded C using the Keil IDE to identify and display the first occurring fault.

Technical Skills

Expertise	Operating Systems,RDBMS,DSA
Languages	C,C++
Software and Tools	Cadence Virtuoso, MATLAB Simulink , LT Spice

Co-Curricular Achievements

- Participated in Kriya, an intra-college technical event, in 2023.
- Volunteered in Shristi, an inter-college technical event, in 2024.
- Conducted a workshop titled "AI on the Edge" during Shristi 2025.
- Serving as a member of the IEEE Student Chapter 12951.
- Secured 2nd Prize in the Innovision Ideathon conducted by the ECE Association.
